About This Workshop

The **IFP Delivery Partner Workshop** is a two-day, hands-on practitioner programme for Anaplan partner consultants implementing — or preparing to implement — **Integrated Financial Planning 2.0** for customers.

Built on the **App Framework**, IFP 2.0 replaces hand-crafted model builds with a configuration-driven approach: 43 guided questions determine your model's complete architecture — hierarchies, financial modules, planning methods, and data structure. The workshop walks you through every step: configurator walkthrough, model generation, error-log review, post-generation verification, and two hands-on extension labs.

This is not a product overview. By the end of Day 2, you will have configured, generated, and extended a real IFP model in a live training tenant.

Who Should Attend

Role	Relevant If...
IFP Delivery Consultant	You are implementing or expect to implement IFP for a customer in the next 12 months
Solution Architect	You design IFP architectures and want hands-on depth in App Framework configuration
Senior Model Builder	You build IFP extensions and need to understand upgrade-safe extension patterns

Prerequisites

- ✓ Active Anaplan workspace admin access — confirmed before Day 1
- ✓ Model Builder (MB), Solution Architect (SA), or Master Anaplaner certification
- ✓ Prior experience building or configuring Anaplan models
- ✓ Familiarity with financial planning concepts (P&L, balance sheet, headcount)

Format & Time Commitment

Format Instructor-led, hands-on in a live training tenant	Duration 2 full days (approx. 6–7 hrs each)	Access Credentialed Anaplan delivery partners	Certification Counts toward IFP delivery cert requirement
---	--	---	---

What You'll Be Able to Do

Six verifiable, practitioner-level outcomes — each maps directly to a real delivery scenario you will encounter on a customer engagement.

1

Configure the IFP App Framework end-to-end — 43 questions answered, model architecture defined, generation triggered.

2

Read, interpret, and resolve generation error logs without escalating basic formula errors to Anaplan support.

3

Build a multi-layer adjustment extension on the Direct Input planning method — correctly tagged, upgrade-safe.

4

Build a Headcount × Rate planning method from scratch — module structure, formula logic, and UX wiring.

5

Map the six Anaplan Way delivery phases for IFP and know which configuration decisions belong in each phase.

6

Apply the 7 extension best practices that keep IFP models upgradeable across App Framework version releases.

■ Completing this workshop counts toward your IFP delivery certification in the Anaplan Partner Program.

Two-Day Workshop Structure

Day 1 — Configuration

35 min	IFP Overview + Anaplan Way for IFP	<i>Tell / Show</i>
45 min	App Framework Configurator Walkthrough	<i>Guided</i>
60 min	Lab A: Configurator Exercise — FintechCo	<i>Hands-On Lab</i>
30 min	Model Generation	<i>Demo + Do</i>
20 min	Post-Generation Checklist	<i>Checklist</i>
60 min	Error Log Review + Hands-On Lab	<i>Hands-On Lab</i>

Day 2 — Extensions

30 min	Extensions Overview + 7 Best Practices	<i>Tell / Show</i>
45 min	Lab B: Direct Input + Adjustments Extension	<i>Hands-On Lab</i>
60 min	Lab C: Headcount × Rate Planning Method	<i>Hands-On Lab</i>
60 min	Knowledge Check + Debrief	<i>Discussion</i>
30 min	IFP Roadmap — What's Coming	<i>Briefing</i>
—	Q&A + Wrap-Up	

All sessions follow the **Tell · Show · Do** instructional design model:

Tell	Facilitator explains the concept — what it is and why it matters for IFP delivery
Show	Live demonstration in the training tenant — follow along in your own workspace
Do	Independent hands-on exercise — complete the task, raise blockers, debrief with peers

Why IFP — and Why Now

IFP 2.0 is Anaplan's next-generation finance application. Built on the App Framework, it replaces hand-crafted model builds with a configuration-driven approach — the same 43 questions shape the architecture for every customer. Implementations are faster, more consistent, and upgradeable as Anaplan releases new capabilities.

For partners, this is a meaningful shift in how IFP delivery works. Partners who train now position themselves ahead of growing customer demand.

Only 14	IFP-credentialed delivery resources exist in the global partner ecosystem today — massive opportunity
43 questions	determine the complete model architecture — knowing them cold separates great IFP partners from mediocre ones
4 models	generated in a single operation: P&L, Balance Sheet, Headcount, and OpEx — all from one configurator run
Upgrade-safe	extension patterns mean your customisations survive App Framework version releases without rework

Ready to certify your delivery team?
Contact your Partner Success Manager to register for the next cohort.
Seats are limited — early registration is recommended.
